

PSC Lunch & Learn Process Automation

Can your organization benefit from **Process Automation**?

PSC Lunch & Learns expand the imaginations of your team members as we discuss the benefits and costs of this exciting technology.

Schedule your free Lunch & Learn

Many organizations are discovering the efficiency improvements offered by process automation. HR, finance, procurement, and accounting departments have all found that the automation of repetitive tasks increases organizational efficiency and frees time for a more progressive agenda.

Lunch & Learn topics may include:

- Map a business process out as a workflow
- Turn a process workflow into an automated task
- Demonstrate the difference between an automated and a manual process
- See how eSignatures can reduce effort and increase security within your approval process
- Learn how complicated documents can be created

What you need to know:

1. Call to express your interest and discuss additional expectations
2. Our experts will conduct a 90-minute Lunch & Learn session at your office
3. Lunch will be provided by PSC

Topics and demonstrations available for your Lunch & Learn

Process Automation	Process automation is the use of technology to automate manual business processes. It promises the reduction of employee time and effort spent creating and retrieving data from disparate systems.
Promapp Process Mapping	Promapp is a Nintex tool which documents a business process and creates an actionable template that can be used for automation. It promises the simplification of the automation process through improved process knowledge, increased team engagement, process variation, tracking and reporting.
Process Center of Excellence	Nintex's Center of Excellence compiles workflows from various departments, monitors workflow performance, discovers data-driven trends, finds actionable insights with process intelligence software. Nintex Hawkeye process intelligence and 3rd party AI services monitor, analyze, and enhance business processes.
Forms & Workflow	Explore the benefits of Nintex Forms & Workflow like seamless integration, increased visibility, and accelerated approvals. Learn how Forms can help your organization eliminate paper forms and easily capture information virtually anywhere. Learn how Workflow can automate manual, repetitive work with workflows and robotic process automation.
Dynamic Forms	Apply pre-set or custom business rules to build dynamic forms that respond based on user input. Conditional formatting and validation allow end-users to see only the fields they need to fill out, ensuring the right information is collected the first time around.
Electronic Signature	Move faster through the approval processes via Nintex Sign powered by Adobe. Create e-signature tasks within your workflow, send reminders, and track progress to simplify any business process requiring signature approvals.
Robotic Process Automation	Leverage trained bots to automate routine tasks in a drag and drop interface without using code. Streamline processes fueled by both structured and unstructured data sources. Discover the ways RPA is enabling employees to focus their efforts on a more progressive agenda.
Document Generation	Eliminate manual creation of critical documents like contracts, work orders, and invoices. Automatically generate documents and easily enable e-signatures. Utilize digital forms to quickly automate processes across teams and systems.
